

GHS-380S Stirrer Quick Start Guide

What's in the box:

- Quick Start Guide
- Stirrer
- Stirring Bar
- Power Cable(s)

INITIAL SETUP

- Unpack the stirrer and place on a stable, temperature resistant surface.
- Ensure the location of the stirrer is clean and free of explosive, flammable and hazardous substances.
- Place the stirrer at least four inches (4") from the wall or any other items.
- Keep the stirrer away from the effects of high magnetic fields.
- Do not cover the stirrer.
- Do not operate the stirrer with a damaged power cord.
- Connect the power cord to the appropriate voltage power outlet.

OPERATION

- 1) Use the main power switch located on the rear of the unit to power-up the stirrer. The unit will perform self-diagnostics.
- 2) Place a vessel with the desired liquid on the surface of the stirrer and carefully place the stirring bar in the vessel.
- 3) Stirring speed can then be set using the control knob below the display panel.

Setting stirring function:

- Set the desired stirring speed by slowly rotating the speed control knob labeled 'STIR' to the desired value shown on the right side of the display.
- Press the STIR knob to begin stirring.
- The LCD display will show the actual speed value on the left side while stirring.
- The stirring function can be turned off by pressing the STIR knob again.

NOTE: Main Power Switch is located on the rear of the unit.
